

Retirement Savings, Simplified

STATE OF MISSOURI 457 DEFERRED COMPENSATION PLAN

Fee and Investment Disclosure | September 30, 2016

This disclosure document includes important information to help you understand the fees associated with your plan and to compare the expenses and fees of the investment options made available in your retirement plan. If you have further questions regarding the plan's investment options, would like to view the most recent monthly and quarterly performance, direct your contribution allocations, transfer from one investment option to another, or to request a printed copy of this disclosure you may log on to Account Access at www.modeferredcomp.org or contact us at 800-392-0925.

I. PLAN RELATED INFORMATION

This section discusses fees that may be assessed to your account, either as a participant in the plan or for services made available by the plan that you may choose to use.

ADMINISTRATION	
Per Participant Fee	\$15 annual fee ¹ plus an additional 0.09% of assets
BROKERAGE	
Self-Directed Brokerage ^{2,3,4}	\$0 one-time setup fee (additional fees by brokerage provider also apply)
FINANCIAL PLANNING	
Financial Needs Assessment	\$0
Goal Specific Financial Plan	\$175 (waived for participants with a minimum balance of \$100,000)
Comprehensive Financial Plan	\$450 (waived for participants with a minimum balance of \$200,000)
EXPEDITED DISBURSEMENT	
Wire	\$15 per use
FedEx	varies by delivery address
LEGAL	
Domestic Relations Order Processing	\$0 per divorce

Some of the plan's administrative expenses for the preceding quarter were paid from the total operating expenses of one or more of the plan's investment options. The total operating expenses of each investment, which include any amount paid to offset administration, are shown in Section II Investment Related Information.

- There is a per participant fee charged to each participant's account. Currently, that fee is \$34 per participant per year. The fee will be offset each year by reimbursements received from the investment options offered in the Plan. This year, each participant will be charged \$1.25 per month. This amount will be reported as a transaction on your quarterly Participant Statement while the 0.09% is reflected in fund performance. The fee covers the cost of the local customer service office, mailings, booklets, recordkeeping, and the general administration of your Plan. If you have a balance in the 457 Deferred Compensation, this fee will not be charged in the 401(a) Plan.*
- The following funds are charged an explicit fee of 0.09% of assets up to a cap of \$50 annually: Vanguard LifeStrategy, Vanguard Total Stock, Vanguard Inflation-Protected Securities, SEI S&P 500 Index, and Nationwide Institutional Service Class. The TD Ameritrade brokerage account balances are charged 0.03% up to a cap of \$16.68 annually. This practice helps to better equalize administrative fees for participants in the plan. Fees will be displayed Pro-rata in the gain/loss section of your core investment options.*
- ICMA-RC and TD Ameritrade are separate, unaffiliated companies and not responsible for each other's services or policies. Brokerage services are provided by TD Ameritrade, Inc. a registered broker-dealer and member of FINRA/SIPC/NFA. TD Ameritrade is a trademark jointly owned by TD Ameritrade IP Company, Inc. and the Toronto-Dominion Bank. Used with permission.*
- For a complete list of brokerage account fees and charges, please refer to the TD Ameritrade Commissions and Service Fees document. To obtain a copy, call 800-392-0925 or visit www.modeferredcomp.org.*

II. INVESTMENT RELATED INFORMATION

Performance

Fund past performance, as shown, is no guarantee of how the fund will perform in the future. The performance shown has been annualized for periods greater than one year. Investment returns and principal value will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. For current performance, contact ICMA-RC by calling 800-392-0925 or by visiting www.modeferredcomp.org.

Fund performance is shown comparing it to a "benchmark" which may be a (i) broad-based securities market index (ii) a group of mutual funds with similar investment objectives, or (iii) a short term government backed debt obligation such as a U.S. Treasury Bill. An index is not available for direct investment, is unmanaged, and does not reflect the costs of portfolio management or trading. A fund's portfolio may differ from the securities held in an index.

The performance displayed for each of the plan's investment options is net of fees and therefore includes the effects of the total annual operating expenses on the rate of return.

The current fund options for the State of Missouri Deferred Compensation Plan (including the 401(a) Savings Incentive Plan) is the Missouri Target Date Funds, Missouri Stable Income Fund, the MOSERS Investment Portfolio (MIP) Fund and the TD Ameritrade Self-Directed Brokerage.

For the other funds that are listed here, please note the following important information. Transfers in are not allowed, but contributions can be received as long as those contribution investment elections were determined and finalized by you prior to May 1, 2009. If you want to make any changes to your investment election going forward, you can choose from the standard line-up (Missouri Target Date Funds, Missouri Stable Income Fund, MIP Fund and the TD Ameritrade Self-Directed Brokerage). Any alteration of the original 100% of contribution investment elections in place prior to May 1, 2009 (if applicable to you) will forfeit your ability to continue contribution to the 29 eliminated (frozen) options.

* Morningstar places funds in certain categories based on the fund's historical portfolio holdings. Placement of a fund in a particular Morningstar category does not mean that the fund will remain in that category or that it will invest primarily in securities consistent with its Morningstar category. A fund's investment strategy and portfolio holdings are governed by its prospectus, guidelines or other governing documents, not its Morningstar category.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Morningstar, Inc. is a global investment research firm that is not affiliated with ICMA-RC. ICMA-RC does not independently verify Morningstar data.

- 1 Effective September 17, 2014, the ING Stable Value Income Fund is now known as the Missouri Stable Value Income Fund.
- 2 Performance calculations are provided by Voya Investment Management. The Missouri Stable Income Fund is neither insured nor guaranteed by the Federal Deposit Insurance Corporation (FDIC) or any other government agency.
- 3 The Fund is not a complete solution for all of your retirement savings needs. An investment in the Fund includes the risk of loss, including near, at or after the target date of the Fund. There is no guarantee that the Fund will provide adequate income at and through an investor's retirement.
- 4 Performance calculations are provided by Alliance Bernstein.

- 5 *The MIP Fund Option is valued on a monthly basis due to some of the underlying investments being illiquid in nature, such as real estate and private equity. The share price for the current month will be calculated at the end of the next month. This causes the timing of performance results to lag compared to other mutual funds. This also affects the performance displayed on your quarterly statement. For example, if you are viewing performance returns as of a certain quarter, the performance of the MIP Fund Option for the various time periods is as of the month before the quarter end. In addition, the quarterly performance return will be for the prior quarter end. Please direct any questions about the fund performance to a State of Missouri Deferred Compensation Plan participant service representative at 800-392-0925.*
- 6 *Please read the fund's prospectus carefully for a complete summary of all fees, expenses, investment objectives and strategies, risks, financial highlights, and performance information. Investing involves risk, including possible loss of the amount invested. Investors should carefully consider the information contained in the prospectus before investing. You may contact us to obtain a prospectus or to answer questions by calling 800-669-7400, emailing investorservices@icmarc.org, or visiting www.icmarc.org.*
- 7 *Certain information including, but not limited to, benchmark performance or other performance and/or fee information, is provided by Morningstar, Inc., © 2016 All rights reserved. This information: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed and (3) is not warranted to be accurate, complete or timely. Neither Morningstar and/or its content providers are responsible for any damages or losses arising from any use of information. Morningstar is a registered trademark of Morningstar, Inc.*
- 8 *A fixed income fund is subject to credit risk and interest rate risk. Credit risk is when an issuer of a fixed income security may be unable or unwilling to make payments of principal or interest to the holders of these securities or may declare bankruptcy. Fixed income securities fluctuate in value as interest rates change. When interest rates rise, the market prices of fixed income securities will usually decrease; when interest rates fall, the market prices of fixed income securities usually will increase.*
- 9 *American Century® is a registered trademark of American Century Services Corporation.*
- 10 *Certain funds may be subject to style risk, which is the possibility that the investment style of its investment adviser will trail the returns of the overall market. In the past, different types of securities have experienced cycles of outperformance and underperformance in comparison to the market in general. For example, growth stocks have performed best during the later stages of economic expansion and value stocks have performed best during periods of economic recovery. Both styles may go in and out of favor. When the investing style used by a fund is out of favor, that fund is likely to underperform other funds that use investing styles that are in favor.*
- 11 *Funds that invest primarily in mid-capitalization companies involve greater risk than is customarily associated with investments in larger, more established companies. Equity securities of mid-capitalization companies generally trade in lower volume and are generally subject to greater and less predictable price changes than the securities of larger companies.*
- 12 *Funds that invest primarily in small-capitalization companies involve greater risk than is customarily associated with investments in larger, more established companies. Equity securities of small-capitalization companies are generally subject to greater price volatility than those of larger companies due to less certain growth prospects, the lower degree of liquidity in the markets for their securities, and the greater sensitivity of smaller companies to changing economic conditions. Also, small-capitalization companies may have more limited product lines, fewer capital resources and less experienced management than larger companies.*
- 13 *Funds that invest in foreign securities are exposed to the risk of loss due to political, economic, legal, regulatory, and operational uncertainties; differing accounting and financial reporting standards; limited availability of information; currency fluctuations; and higher transaction costs. Investments in foreign currencies or securities denominated in foreign currencies (including derivative instruments that provide exposure to foreign currencies) may experience gains or losses solely based on changes in the exchange rate between foreign currencies and the U.S. dollar. The risk of investing in foreign securities may be greater with respect to securities of companies located in emerging market countries. The value of developing or emerging market currencies may fluctuate more than the currencies of companies with more mature markets.*
- 14 *T. Rowe Price® is a registered trademark of T. Rowe Price Group, Inc. - all rights reserved.*
- a *Certain information including, but not limited to, benchmark performance or other performance and/or fee information, is provided by Morningstar, Inc., © 2016 All rights reserved. This information: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed and (3) is not warranted to be accurate, complete or timely. Neither Morningstar and/or its content providers are responsible for any damages or losses arising from any use of information. Morningstar is a registered trademark of Morningstar, Inc.*
- b *The S&P 500 Index consists of 500 companies representing larger capitalization stocks traded in the U.S.*
- c *The BofA ML US 3-5 Yr Treasury Index is an unmanaged index consisting of all public U.S. Treasury obligations having maturities from 3 to 4.99 years.*
- d *The Funds Morningstar Category Average is a group of funds with similar investment objectives and strategies and is the equal-weighted return of all funds per category. Morningstar places funds in certain categories based on a funds historical portfolio holdings.*
- e *The Bloomberg Barclays U.S. Aggregate Bond Index consists of investment-grade U.S. fixed income securities.*
- f *The Bloomberg Barclays U.S. Treasury Inflation-Linked Bond Index (Series-L), consists of all U.S. Treasury inflation protected securities rated investment grade or better, having at least one year to final maturity and at least \$250 million par amount outstanding. The Series-L reference identifies this index as the former Lehman Brothers U.S. TIPS Index.*

- g The Dow Jones U.S. Total Float Adjusted Index is designed to reflect the performance of all U.S. equity securities that have readily available prices.
- h The Russell 3000® Value Index measures the performance of those Russell 3000® Index companies with lower price-to-book ratios and lower forecasted growth values. The stocks in this index are also members of either the Russell 1000® Value or the Russell 2000® Value indexes.
- i The CRSP US Total Market Index consists of companies representing mega, large, small and micro capitalization stocks traded in the U.S. on the NYSE, NYSE Market, NASDAQ or ARCA.
- j The Russell 1000® Growth Index measures the performance of the large-cap growth segment of the U.S. equity universe. It includes those Russell 1000® Index companies with higher price-to-book ratios and higher forecasted growth values.
- k The Russell Midcap® Value Index measures the performance of the mid-cap value segment of the U.S. equity universe. It includes those Russell Midcap® Index companies with lower price-to-book ratios and lower forecasted growth values.
- l The Russell 2000® Value Index measures the performance of those Russell 2000 companies with lower price-to-book ratios and lower forecasted growth values.
- m The S&P SmallCap 600 Index is an unmanaged capitalization-weighted index representing all major industries in the small-cap of the U.S. stock market.
- n The Russell 2000® Index measures the performance of the small-cap segment of the U.S. equity universe. The Russell 2000® Index is a subset of the Russell 3000® Index, and includes approximately 2,000 of the smallest securities based on a combination of their market cap and current index membership.
- o The MSCI World Index (Net) is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance around the world. The net version of this index reinvests dividends after the deduction of withholding taxes, using a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties.
- p The MSCI All Country World ex USA Index (Net) is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of large and mid cap segments of developed and emerging markets, excluding the U.S. The net version of this index reinvests dividends after the deduction of withholding taxes, using a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties.
- q The MSCI Emerging Markets Index (Net) is a free float-adjusted market capitalization index of equity securities that is designed to measure the equity market performance of emerging markets. The net version of this index reinvests dividends after the deduction of withholding taxes, using a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties.

Fees and Expenses

The fees and expenses table below discloses total annual operating expenses for the plan's investment options as well as any shareholder-type fees or trading restrictions. The total annual operating expenses of these investment options reduce their rate of return.

The cumulative effect of fees and expenses can substantially reduce the growth of your retirement savings. Visit the Department of Labor's Web site for an example showing the long-term effect of fees and expenses at <http://www.dol.gov/ebsa/publications/understandingretirementfees.html>. Fees and expenses are only one of many factors to consider when you decide to invest in an option. You may also want to think about whether an investment in a particular option, along with your other investments, will help you achieve your financial goals.

1 Effective September 17, 2014, the ING Stable Value Income Fund is now known as the Missouri Stable Value Income Fund.

2 The Fund is not a complete solution for all of your retirement savings needs. An investment in the Fund includes the risk of loss, including near, at or after the target date of the Fund. There is no guarantee that the Fund will provide adequate income at and through an investor's retirement.

4 Please read the fund's prospectus carefully for a complete summary of all fees, expenses, investment objectives and strategies, risks, financial highlights, and performance information. Investing involves risk, including possible loss of the amount invested. Investors should carefully consider the information contained in the prospectus before investing. You may contact us to obtain a prospectus or to answer questions by calling 800-669-7400, emailing investorservices@icmarc.org, or visiting www.icmarc.org.

5 A fixed income fund is subject to credit risk and interest rate risk. Credit risk is when an issuer of a fixed income security may be unable or unwilling to make payments of principal or interest to the holders of these securities or may declare bankruptcy. Fixed income securities fluctuate in value as interest rates change. When interest rates rise, the market prices of fixed income securities will usually decrease; when interest rates fall, the market prices of fixed income securities usually will increase.

6 American Century® is a registered trademark of American Century Services Corporation.

7 Certain funds may be subject to style risk, which is the possibility that the investment style of its investment adviser will trail the returns of the overall market. In the past, different types of securities have experienced cycles of outperformance and underperformance in comparison to the market in general. For example, growth stocks have performed best during the later stages of economic expansion and value stocks have performed best during periods of economic recovery. Both styles may go in and out of favor. When the investing style used by a fund is out of favor, that fund is likely to underperform other funds that use investing styles that are in favor.

8 Funds that invest primarily in mid-capitalization companies involve greater risk than is customarily associated with investments in larger, more established companies. Equity securities of mid-capitalization companies generally trade in lower volume and are generally subject to greater and less predictable price changes than the securities of larger companies.

- 9 *Funds that invest primarily in small-capitalization companies involve greater risk than is customarily associated with investments in larger, more established companies. Equity securities of small-capitalization companies are generally subject to greater price volatility than those of larger companies due to less certain growth prospects, the lower degree of liquidity in the markets for their securities, and the greater sensitivity of smaller companies to changing economic conditions. Also, small-capitalization companies may have more limited product lines, fewer capital resources and less experienced management than larger companies.*
- 10 *Funds that invest in foreign securities are exposed to the risk of loss due to political, economic, legal, regulatory, and operational uncertainties; differing accounting and financial reporting standards; limited availability of information; currency fluctuations; and higher transaction costs. Investments in foreign currencies or securities denominated in foreign currencies (including derivative instruments that provide exposure to foreign currencies) may experience gains or losses solely based on changes in the exchange rate between foreign currencies and the U.S. dollar. The risk of investing in foreign securities may be greater with respect to securities of companies located in emerging market countries. The value of developing or emerging market currencies may fluctuate more than the currencies of companies with more mature markets.*
